Portfolio: "currently putting the finishing touches before deployment"

· ·

Web developer with comprehensive experience handling various projects from creative design to project construction. Certificate from Georgia Tech Professional Education in full stack web technologies, including React, JavaScript, NoSQL, GraphQL, Node.js, CSS, and HTML. I am fascinated by coding logic and de-structuring challenges into logical step-by-step solutions. My experience in building, creating, and learning is the reason I chose a career in development, all of which are the foundation of web development. I strive to finish everyday having played a part in making the web a better place for everyone. Recently, I took on the role of project lead to oversee the wireframe, design, and development of our cohort's final project, leading the team of five developers to a perfect 100 score. Conclusively my experience implementing real world design concepts and proficiency with problem solving, sets me up to be an excellent addition to any development team.

TECHNICAL SKILLS
Languages: JavaScript, HTML, CSS, JSX
Frameworks: React, Express
Core Concepts: wireframing, mobile first responsive design, DRY

PROJECTS
Dungeons And Devs
GitHub: https://github.com/hackpres/DnDevs_React
Deployment: https://dungeons-n-devs.herokuapp.com/
● Dungeons and Devs is a browser based game where you take on the role of a developer navigating and looting dangerous dungeons. Will you be able to find the code you need to survive!
● Project Lead, Designer, developed battle logic
● React, Apollo GraphQL, Node.js, JWT, CSS, Styled-components, HTML.

TekTalks
GitHub: https://github.com/hackpres/TekTalks
Deployment: https://tektalkblog.herokuapp.com/
● TekTalks is a blogging site for tech enthusiasts.
● Sole Developer
● Node.js, Express and handlebars, MySQL/Sequelize, JavaScript, HTML, CSS

Coding Quiz
GitHub: https://github.com/hackpres/codingQuiz
Deployment: https://hackpres.github.io/codingQuiz/
● Timed Coding quiz with dynamically updated html and css powered by JavaScript.
● Sole Developer

- JavaScript, HTML, CSS, local storage

EXPERIENCE
Junior Web Developer
2022 – Present
FoType
Charleston, SC
Role includes meeting weekly with clients to provide input on project progress and direction. As well as designing site layouts using Wordpress and Divi Builder, and creating wireframes for web projects using Adobe XD.

Lighting Designer
2021 – 2022
Johnson Ferry Baptist Church
Marietta, GA
Brought outdated lighting systems and file structures up to date, while enhancing online experience and quality. Worked with a team of five production employees. Meeting with department teams pre and post events to organize and plan. Overseeing various lighting equipment in multiple venues including computers, lamps, moving head fixtures, and static fixtures. And designing and implementing lighting shows for weekly service events.

Self Employed
2020 – 2021
Marietta, GA
Met with clients, to prepare and design for their events. Collaborated with client team members to execute 'day of event' needs. Designed and implemented lighting shows to fit their theme and demographics.

Project Manager
2013 – 2020
Ark Live
Cumming, GA
Assisted as a vital team leader growing Ark Live from a startup in a garage to a multi-million dollar national touring Audio, Video, and Lighting provider.
Responsibilities included overseeing contractors for event prep, construction and day of event. Designing, constructing, and installing various stage set pieces. Planning event packages accounting for every eventuality so clients always had what was needed. Designed lighting shows, and LED video packages for touring artists.

EDUCATION
Certificate in Full Stack Web Development: Georgia Tech, Atlanta, GA
